

APPLICATIONS

Sanitizing

Odor Control

Dust Suppression

Pesticides

Humidification

Portable Fog Unit

FOG-IT 10-2

SPECIFICATIONS

Dense fog pattern with 2 tips

Tips mount to S.S. plate for increased protection

Runs on compressed air

10 gallon pre-mix tank

The portable fog unit operates on compressed air and utilizes an air operated pump. Compressed air and pressurized solution are fed separately to each tip to produce a high fog volume with a micron size of 10-15. The tips project fog up and out 12 ft. from the unit, which will completely fill a 8,000 cubic foot room in less than five minutes. (Test Room: 28x31x9.5ft)
