

Stop using harsh solvents and get a greener clean.

Our parts washers work with aqueous (water-based) chemistry, so they're easier on your parts, your hands, and the planet.

Cleaner & greener

- choose your chemistry – works with most aqueous (water-based) cleaning & degreasing products
- heated version only –
 - heats solution to 105 °F (40.6 °C) for better cleaning performance
 - separate heater & flow controls save energy during off hours

Built for the job

- flow-through brush and flexible rinse line – use simultaneously or separately
- counter-height work surface – 36 in. (91.4 cm)
- 18 x 30 in. (45.7 x 76.2 cm) sink interior
- weight capacity – up to 400 lbs. (181.4 kg)
- fluid capacity – 20 gallons (75.7 liters)
- durable construction
- sink drain grate to catch small parts
- lid with hold-open support – limits evaporation, but stays out of your way

Speed up service

- top-access 250 micron filter
- modular design – easily separate base, sink, and control modules
- sloped interior base to collect sediment away from pump intake
- round interior corners for easy reservoir cleaning

APW20HT – HEATED PARTS WASHER, electric
APW20 – PARTS WASHER, air-operated
