

2-Product Electric Spray Unit SP-JRV-2-RAC

The SP-JRV-2-RAC is designed for use with two-part products that are applied in series, but cannot be mixed together prior to application.

Specifications:

- Powered by electricity (120 VAC)
- Draws from pre-mixed solution
- Draws two separate chemical products, with no shared wetted components
- Double spray wand lets the user apply product A or B without having to switch between multiple wands
- Viton pump seals
- 100 ft. discharge hose
- Flow rate: approx. 1 GPM per nozzle
- 40° fan tip spray pattern
