**10 Gallon Air Operated Portable Fog
Equipment**

English (Original Instructions)

READ ALL INSTRUCTIONS BEFORE OPERATING EQUIPMENT

WARNING

Read this manual completely and understand the machine before operating or servicing it.

- Read all instructions before installing or operating unit.
- Always wear appropriate personal protective equipment (PPE) when operating or servicing unit.
- Always follow all chemical safety precautions and handling instructions provided by the chemical manufacturer and Safety Data Sheet (SDS).
- If this unit is modified or serviced with parts not listed in this manual, the unit may not operate correctly.
- Always depressurize unit after use (as described in the After Use Instructions).
- Do not exceed an incoming air pressure of 100 psi (7 bar).
- Do not exceed a fluid temperature of 100°F (37°C).
- Always flush the unit with fresh water for 5 minutes when switching from an alkaline to an acid or an acid to an alkaline.
- Never use unit with hydrocarbons or flammable products.
- Only use clean and dry air. Air must be filtered and free of moisture or pump life will be diminished. If needed, install an air dryer before unit.
- Do not use an air lubricator before the unit.
- Never use unit if it is damaged or leaking.

PROTECT THE ENVIRONMENT

Please dispose of packaging materials, old machine components, and hazardous fluids in an environmentally safe way according to local waste disposal regulations.

 Always remember to recycle.

*Specifications and parts are subject to change without notice.

READ ALL INSTRUCTIONS BEFORE OPERATING EQUIPMENT

OPTIONS		
	Pump Seal Material	
FG-10N	Santoprene (standard)	-2
	Viton (V)	
	Kalrez (K)	
Add bold option codes to item number as shown. For standard options, no option code is needed. Examples: <ul style="list-style-type: none"> • FG-10N-2 (standard unit with Santoprene pump seals) • FG-10NV-2 (unit with Viton pump seals) 		

REQUIREMENTS	
Compressed air requirements	50 psi (3.4 bar) with 7 cfm (198.3 l/min)
Liquid temperature range	40-100°F (4.4-37°C)
Chemical compatibility	Chemical products used with this equipment must be formulated for this type of application and compatible with unit materials and pump seals. For more information on chemical compatibility, consult the manufacturer or SDS for your product or contact our customer service department.

SPECIFICATIONS	
Power type	Compressed air
Chemical pickup type	Draws from pre-mixed solution
Number of products unit can draw from	One product
Suction line length/diameter	3/8 in. (9.5 mm) inside diameter
Capacity	12.5 gallons (47.32 liters)
Flow rate*	3.7 gal/hour at each nozzle
Pump seals	Santoprene, Viton, or Kalrez
Droplet size	15 microns at 50 psi
Coverage area**	1 liter of solution will cover approximately 1000 cubic feet (up to system max of 47,320 cubic feet).
Run time from full tank**	Approx. 1.5 hours
Number of nozzles	2 nozzles
Wheel type	Two 10 inch non-marking wheels

*Dilution rates and flow rates given are based on chemical with viscosity of water and factory air pressure settings.

**Area covered and run time may vary based on humidity, air flow, and product used.

READ ALL INSTRUCTIONS BEFORE OPERATING EQUIPMENT

Operation Instructions

Always follow all chemical safety precautions and handling instructions provided by the chemical manufacturer and Safety Data Sheet (SDS).

1. Follow all instructions from chemical manufacturer. Fill the tank with water and the advised percentage of chemical concentrate.
2. Place the unit in the area to be fogged.
3. Ensure the air supply valve (BVB14) is in the closed position, and connect a compressed air line to the air inlet fitting (AP25).
4. Open the air supply valve (BVB14) to activate the unit.
5. Evacuate the area.
6. After the unit has stopped fogging, observe all appropriate safety precautions before reentering area. Close the air supply valve (BVB14) and disconnect the compressed air line from the unit.

After Use Instructions:

1. Flush the unit with fresh water for 5 minutes.
2. Disconnect the air line from the air fitting (AP25).

Maintenance Instructions:

To keep your portable unit operating properly, periodically perform the following maintenance procedures:

- Check the air pump (P56/P56K/P56V) for wear and leaks.
- Inspect hoses for leaks or excessive wear. Make sure all hose clamps are in good condition and properly secured.
- Check the suction tube and screen for debris and clean as needed.
- Drain compressor tank on a regular basis to ensure proper operation of pump.

Troubleshooting Instructions:

- If air passes through the pump (P56/P56K/P56V) without cycling, the pump needs to be replaced.
- Check the chemical suction line and strainer for debris or damage. Clean or replace as needed. To prevent damage to the unit, the strainer (STR38-IL) must always be used.
- Check for proper air pressure on air gauge (AG100). Air regulator (R14) is factory set at 50 psi (3.4 bar).
- If the unit foams at a reduced pressure:
 - o Check the air compressor supplying the unit. If the pressure is less than 40 psi, turn the foam unit off until the compressor can catch up.
 - o If the air supply is 50 psi (3.4 bar) or above, check the AG100, which should read near 50 psi (3.4 bar). If the AG100 is more or less than 50 psi (3.4 bar), adjust the pressure by turning the knob on the top of the air regulator (R14).

STR38-IL	IN LINE STRAINER 3/8 BARB 20 MESH 304 STAINLESS EDPM GSKT
TANK-10N	10 GALLON NATURAL TANK
TW916	1/2 INT TOOTH L/W 410SS
W15	NONMARKING WHEEL FOR PORTABLE UNITS
WS-20CFM	TSUNAMI WATER SEPARATOR 20 CFM

TIMER ADJUSTMENT INSTRUCTIONS

The TR120MF is a multifunction timer.

1. The four switches in the top left (Function) control the timer mode. For fogging/misting applications, switches **A, C, and D** should be ON, and switch **B** should be OFF. This puts the timer in Dual Mode.
2. The six switches in the bottom left (Time Base) control the time interval. The timer is factory set to MINUTES. To change the Time Base to seconds or hours, refer to the chart below.
3. The five switches in the top right (Dual Mode t1) control the delay time.
4. The five switches in the the bottom right (Dual Mode t2) control the run time. The active time for each function is equal to the combined values of any switch(es) that are ON.

NOTICE: the timer is factory set at 2 minute delay, 8 minute run time.

1. FUNCTION (A to D):
This setting puts the time in Dual Mode.

2. TIME BASE (E to K):
Switches E, F, and G control t1.
Switches H, J, and K control t2.

SEE CHART ON SIDE FOR FUNCTION & TIME BASE SETUP

Timer Setting Example

In this example, the delay time has been set to 5 minutes, and the run time has been set to 20 minutes.

1. The FUNCTION is set to Dual Mode.
2. The TIME BASE is set to minutes.
3. The total DELAY time is 5 (1+4=5)
4. The total RUN time is 20 (4+16=20)

3. DUAL MODE (t1):
These switches control the delay time.

4. DUAL MODE (t2):
These switches control the run time.
