

Wall Mounted Foam Unit

For 2-part concentrate products

Item Number: FI-WC-2P

Pump provides reliable dilution, regardless of water pressure fluctuations

Powered by compressed air

Draws from two concentrated products simultaneously

Ideal for 2-part products that need to be mixed on the fly

Dilutes at ratios of 8:1 to 150:1 (water:chemical) for each product

Requires water connection with 10-100 psi (0.69-6.9 bar) incoming water pressure

Anti-kink hose protection

Designed for easy maintenance – quick-change pump

Customization options –

- Pump seal material for compatibility
- Color coding – hose
- Foam wand style – zero degree tip or fan tip
- Stainless steel or all-poly fluid fittings
